

Qatek and Tordivel Solar announce Sales and Service Partnership for Taiwan.

Qatek, a leading distributor in Taiwan and Tordivel Solar AS, a European provider of optical vision solutions for 3D measurements of ingots and blocks and for inline wafer inspection, are working together to further expand their PV activities.

TAPEI / OSLO 16. October, 2009 – Qatek Co., Ltd. and Tordivel Solar AS today announced that the companies have reached an agreement, whereas Qatek will take over all sales and after-sales activities of Tordivel Solar in Taiwan, (ROC).

“Qatek and Tordivel Solar are pleased to jointly announce that the two companies have entered into a distribution agreement which will generate mutual business opportunities and support the growth of the PV segment in Taiwan”, says Luke Cheng, President of Qatek Co., LTD. and Lasse D. Nergaard, CEO of Tordivel Solar AS.

About Tordivel Solar

Tordivel Solar is a supplier of in-line and off-line inspection instruments and measurement systems for the global photovoltaic industry. We develop the most compact, accurate and reliable inspection instruments for automatic production control of ingots, blocks, wafers and solar cells.

The systems are built on Scorpion Vision Software® for user friendliness, configurability, reliability, flexibility and ease of maintenance. Tordivel Solar has key customers and OEM partners within the PV industry for seamless integration of complimentary instruments and system solutions. Tordivel Solar, with its powerful technological platform, aims to be a global leader through focus on development, sales and service of optical measurement systems for the PV industry.

About Qatek

Qatek Co., Ltd. is a leading distributor in Taiwan. By bringing in world class test and measurement instruments and equipment from abroad, Qatek has served most major electronics manufacturers, semiconductor, FPD and R&D institutes in Taiwan for the past 24 years.

The introduction of Tordivel Solar’s measurement instruments and systems will be the right timing to provide systems and solutions to the prosperous photovoltaic (PV) industry in the island.
